

Time Machine Gardens have transformed 3 gardens for us over a number of years. In each case the design was thoughtfully produced to suit our lifestyle at the time and then executed with great workmanship and attention to detail. In the case of the first back garden, it's not too much of an exaggeration to say that the re-design changed our lives, creating an extra, much needed, living space. The vast improvement in the look of both front and back gardens undoubtedly contributed to the easy sale of our property. The second back garden was also beautiful - even managing to incorporate an unsightly trampoline!

I would have no hesitation in wholeheartedly recommending Time Machine Gardens. Not only does Mike produce first class designs but the whole team are an absolute pleasure to have around during the build. We are currently on the waiting list for re-development of our front garden and very much looking forward to another miraculous change in the look of our property.
