

We first used Time Machine Gardens nearly 10 years ago to replace the horrible concrete hard standing in front of our last house with a beautiful paved drive. Since then we have moved and they have transformed a dingy internal courtyard in our new house in to an airy Moroccan styled space and they are just about to start work on our back garden. Mike and his team are friendly, knowledgeable and very easy to work with. Their design judgements are always spot on and many people have commented (favourably!) on the work they have done for us. I would not hesitate to recommend them.
