

Time Machine gardens began working for us about 12 years ago in Chiswick when we bought our first house. They came up with a cost-effective and simple but contemporary design for our small garden, but it suited our needs exactly as a family with a small child. A few years later and a bigger house and again we called Mike and the team come and work their magic. This time we had swings, outdoor toys, hammocks and a lawn to consider (all within 30 feet!). Again the boys came to the rescue with attention to detail and an ingenious use of railway sleepers for edging and lovely big posts for supporting hammocks and plants. And lastly approximately 5 years ago, we moved yet again to another challenging project. Time Machine were our first choice of landscape gardeners and even though they are located out of town, were very happy to travel up to us with constant smiles and helpful ideas. Mike and the team transformed a 100 foot garden from an overgrown forgotten wilderness to a split-level garden for use by children and adults alike. Planting was carefully thought through with ourselves - we were shown beautiful coloured drawings and idea boards and decided upon raised beds combining modern shapes and colours with evergreens - all with easy maintenance being at the forefront of our busy minds. A large play area with climbing frame, inset 12 foot trampoline, playhouses and hidden sheds all appeared as if by magic before our eyes. We love the garden and have really enjoyed watching it evolve over the past few years into a mature, shapely and incredibly useful space by the whole family.

The team at Time Machine have always provided an invaluable service for us - we have always been very impressed with the quality of workmanship and expertise offered and lastly feel that in today's commercial society, really offer good old fashioned value for money with true work values. We have recommended them to many friends over the past ten years and will still continue to do so.

Mrs W, Chiswick
