

Mike and Time machine gardens have helped us work out and bring to fruition 5 separate garden projects over a period of 10 years. Mike has always been very patient, providing good practical and aesthetic advice while listening to and incorporating our ideas and requirements for the finished design. he has always consulted us regularly though out the projects and keeps up good regular communication. Mike's work has always been of extremity high quality and it is always a pleasure to have him and his team working at our house....I am just trying to think of the next project - maybe a pond???
